

**THE SONOMA COUNTY WATER AGENCY
2007 STREAM MAINTENANCE PROGRAM**

***Improving Water Quality for Our Waterways...
Providing Flood Protection for Our Community***

Improving water quality in our waterways and providing flood protection for our community is the goal of the Sonoma County Water Agency’s Stream Maintenance Program. That is why we will target 24 streams within Sonoma County that are in need of water quality and flood protection maintenance. The maintenance work will include forming and promoting the development of shaded riparian canopies with alders and other trees that grow tall and stretch their branches over the stream. Shaded riparian canopies help cool the water and shade out bushes and less desirable species of trees. These less desirable tree species can catch debris and reduce the water-carrying capacity of the stream. Garbage and debris will also be removed from the streams.

**To the right is a list of streams the
Sonoma County Water Agency ►
will be maintaining this summer.**

Stream Name	General Location Description
Santa Rosa	
Abramson	Upstream of Guerneville Rd.
Brush	Montecito - Highway 12
Colgan	Corby - Hearn
Colgan	Hearn - U.S of Victoria
Colgan	Stony Point - Todd Road

Washington	Hawk Dr - Ely
Windsor	
Windsor	Downstream of Windsor Road
Sonoma	
Fryer	3rd St. MacArthur
Fryer	Upstream of Andrieux
Other	
Fife	Armstrong Woods - Hwy 116
To improve water quality and flood protection, we may need to remove some non-canopy forming trees, such as arroyo willows and certain dense shrubs, such as blackberries, from the streams. We encourage you to contact us with any questions about our Stream Maintenance Program. Visit us online at www.sonomacountywater.org .
